

## Clinical Rotation Schedule

The clinical dietetics rotations are designed to develop skills in assessing, planning, implementing and evaluating nutritional care for hospitalized patients. In addition, the Interns participate in team rounds, conferences, group classes and case studies. Strong emphasis is placed on learning the pathophysiology of disease states in relation to nutritional therapy.

Rotation	Supervised Practice Hours	Potential Dates	Site/Facility (Name and Address) Note: Locations are subject to change	Preceptor (Name, title and credentials, emails address, phone number) Note: Preceptors are subject to change
